 **Organisations & Employers:** Send your team as a group and benefit from our corporate rate of **\$900 per person** for 4 or more participants. Single invoice, fully arranged. Contact us to organise group registration.

 **No technical background required.** If you use a computer or smartphone at work, you are fully ready for this programme.

Workshop Topic Areas

 **Programme Note:** The detailed daily schedule will be shared with all registered participants closer to the training date.

AI & Digital Transformation

- ▶ Understanding AI tools: ChatGPT, Copilot, Gemini and sector-specific applications
- ▶ Prompt engineering and AI-assisted daily workflows for every department
- ▶ Digital transformation strategy — moving from manual to AI-powered processes
- ▶ AI ethics, governance and responsible use in professional environments
- ▶ Automating routine processes to save time and improve accuracy

Data & Analytics

- ▶ Reading and interpreting data without any technical background
- ▶ Data-driven decision making for managers and department heads
- ▶ Excel, Power BI and dashboard reporting tools for every function
- ▶ Data quality, management and building a data culture in your organisation
- ▶ Using analytics to measure performance and drive measurable results

HR & People Management

- ▶ AI tools for recruitment, onboarding and talent management
- ▶ Digital HR systems: HRIS, payroll automation and records management
- ▶ People analytics for better workforce planning and retention
- ▶ Performance management frameworks in the digital age
- ▶ Employee experience and digital engagement strategies

Finance, Accounts & Procurement

- ▶ AI-powered financial reporting, forecasting and budgeting
- ▶ Accounts payable and receivable automation tools
- ▶ Digital procurement: e-sourcing, supplier management and spend analytics
- ▶ Fraud detection and financial risk management using AI
- ▶ Compliance, audit trails and digital documentation standards

Risk Management & Compliance

- ▶ Enterprise risk frameworks and digital risk registers
- ▶ Using AI and data to identify, assess and monitor organisational risks
- ▶ Cybersecurity fundamentals for non-technical professionals
- ▶ Business continuity planning in an AI-driven environment
- ▶ Regulatory compliance and digital governance frameworks

Administration & Operations

- ▶ Automating administrative workflows and routine processes
- ▶ Digital document management, filing and records systems
- ▶ Project management tools and AI-assisted scheduling
- ▶ Modern communication and collaboration platforms for teams
- ▶ Building an AI-ready culture across your department
